

PULINDU PASANJITH

Software Engineering Undergraduate

Kelaniya, Colombo, Sri Lanka | +94 77 178 7447 | pulindupasanjith@gmail.com

github.com/pulindu117 | [Portfolio Website](#)

SUMMARY

Software engineering undergraduate with hands-on experience building and deploying web applications and machine learning models. Comfortable across front-end interfaces, Python-based ML/NLP pipelines, and collaborative version-controlled development. Brings a structured, detail-oriented approach from 6+ years managing operations and reporting systems, paired with active coursework in software architecture, requirements engineering, and data structures. Seeking a Software Engineer or Junior Developer role to grow these skills in a professional team.

PROJECTS

Personal Portfolio Website *(HTML, CSS, JavaScript)*

github.com/pulindu117/portfolio-website

- Designed and built a responsive personal portfolio site from scratch using HTML, CSS, and JavaScript, then deployed it via GitHub.
- Implemented a contact/intake form that writes submitted visitor data directly into a connected Google Sheet, and added a one-click CV download feature.

Fake News Detection (NLP Group Project) *(Python, scikit-learn, TensorFlow/Keras, Pandas)*

github.com/pulindu117/NLP_Group_04

- Group NLP project (team of 3, role: project lead) building a fake news classifier on the WELFake dataset (72,000+ news articles) using text preprocessing, feature extraction, and supervised learning.
- Built and evaluated a Logistic Regression baseline and an LSTM deep learning model for binary text classification using a structured, version-controlled notebook pipeline.

PROFESSIONAL EXPERIENCE

Operations & IT Executive — Deepna Transport Pvt. Ltd.

2019 – Present

Colombo, Sri Lanka

- Built Excel-based systems to track trips, fuel usage, income, and detention charges, cutting calculation errors by 90% and improving reporting turnaround by 80%.
- Managed monthly billing, invoicing, payroll, and compliance documentation for container transport operations, working with management to analyze income trends and cost-saving opportunities.

Open Source Contributor — GitHub (First Contributions)

2025

- Completed a full open-source contribution workflow (fork, branch, commit, pull request) with a PR merged into the official repository — practicing collaborative version control as used in professional engineering teams.

EDUCATION

Bachelor of Software Engineering (Honours) — SLTC Research University

2024 – 2028

Padukka, Sri Lanka | GPA: 4.0

- Relevant coursework: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Software Architecture & Design, Software Quality Assurance, Requirements Engineering, Natural Language Processing.

Level 3 Diploma in Management (UK) — ESOF Metro Campus, 2024–2025 (8 Distinctions, 2 Merits)

Assured Diploma in Information Technology (DITEC) — Pearson Assured, 2023–2024 (Distinction)

TECHNICAL SKILLS

- Languages:** Python, Java, JavaScript, HTML/CSS, Bash
- Libraries & Tools:** NumPy, Pandas, Matplotlib, scikit-learn, Git/GitHub, Google Colab/Jupyter, VS Code
- Machine Learning / AI:** ML fundamentals, neural networks, NLP, prompt engineering, Vertex AI (Google Cloud)
- Other:** Cisco Packet Tracer (network simulation & troubleshooting), Advanced Excel/Google Sheets

CERTIFICATIONS & LANGUAGES

- Google Cloud — Generative AI Learning Path (2025) | AWS — Fundamentals of ML & AI (2025)
- Cisco — Intro to Modern AI & Packet Tracer (2025) | Pearson Assured — Diplomas in IT & English (Distinction)
- Languages: Sinhala (Native), English (Proficient), Tamil (Intermediate)
